## 560 / 580 Roller Press

A quality ironing product originally produced some 30 years ago and is much sort over now when time is at a premium and fast professional ironing results are required on the home, B&B, pubs, hotel, nursing homes or laundry.

The 560 roller is a little narrower than the 580, but just as competent. Its ideal for medium and smaller size laundry rooms, where speed and quality of pressing is essential and again YES its a steam roller press!

Variable speed roller with steam for quick and easy ironing. Automatic steam with 60-minute steam capacity, open ends to rollers, variable temperature control and foot pedal operation.

Collapses to vertical position for storage, castors for easy movement, large catching area for ironed laundry, minimum of maintenance.

You are comfortable in control, roller speed, stem and pressure with the foot pedal. No need to dampen your laundry before ironing.

Easy-to-read controls, simply select the steam and heat levels to match your fabric.

Using tap water? don't worry... optical signals warn you when the water is getting low or when the water softener cartridge must be replaced.

Safe and energy-efficient, the steam is automatically turned off after 8 minutes when you take a break. If the electricity should be suddenly disconnected, the roller press can still be opened by hand/

After ironing, fold the ironer together and roll it away. It takes up as much space as a small chair.

### The dimensions of the 560 roller press:

- Unfolded L76 x W40 x H100cm
- Folded L52 x W40 x H82cm
- Roller width 67cm (26.5")
- Working height 84.5cm (33")
- Ironing width 65cm (26")
- Shoe diameter 85mm
- Roller pressure 600N
- Ironing Speed 240 to 680
- Feeding speed 1.25 to 3.58 meters per minute
- Thermostatic temperature control
- -10 Amps
- Water capacity 1.3 litres

### The dimensions of the 580 roller press:

- Unfolded L94 x W40 x H105cm
- Folded L52 x W40 x H100cm
- Roller width 85cm (33.5")
- Working height 90cm (33")
- Ironing width 82cm (32")
- Shoe diameter 85mm
- Roller pressure 600N
- Ironing Speed 240 to 680
- Feeding speed 1.25 to 3.58 meters per minute
- Thermostatic temperature control
- 15 Amps
- Water capacity 1.3 litres
